

Security Lights

Alcoa Electric offers many ways to use lighting to improve your quality of life while providing safety and security for homes or businesses. A few of these lighting services are listed below. Contact Alcoa Electric at (865) 380-4700 for details.

Security Lighting

You can feel more secure while protecting your business or home by leasing a security light from Alcoa Electric. You'll be using the best outdoor lighting equipment available while saving on energy and maintenance costs. A photoelectric cell turns the light on and off automatically, so you never have to worry about it - even when you are away.

100 Watt High Pressure Sodium Lights

- Installed on existing pole = \$6.51 per month
- Installed on additional pole = \$70.00 for installing pole + \$6.72 per month

The lease includes a high-quality, utility grade light fixture installed and maintained by Alcoa Electric. The monthly charge also includes the electricity used by the light. When an additional pole is needed, there will be an additional charge. Prices are subject to change as the cost of equipment and electricity changes. High Pressure Sodium Lights and other special lighting applications are also available; please contact Alcoa Electric for more information.

Subdivision Street Lighting

Because street lighting provides safety and security, Alcoa Electric offers subdivision lighting. If you are interested in subdivision lighting please contact Alcoa Electric Engineering Department at (865) 380-4890.

Want to Sign Up?
